1805 NW Platte Rd Ste 120, Riverside, MO 64150
(816)472-0400, fax (816)472-0813

Wound Care Instructions for a biopsy:

- 1.) Leave the dressing on for 24 hours.
- 2.) After 24 hours, clean the area with a mild soap and water and pat dry with a clean towel.
- 3.) Apply a thin layer of Vaniply Ointment (available at Sunflower Dermatology). Then cover with a bandage.
- 4.) Repeat the above steps daily until the wound is completely healed. This will take approximately 2 weeks.

Keeping your wound moist with ointment reduces scarring and discomfort that can be associated with biopsies.

All benign results will be posted on your patient portal at www.sunflowerdermatology.com. If your results are not listed on the patient portal they will be discussed at your follow up appointment only.

To access your patient portal go to www.sunflowerdermatology.com, click on patient resources, then patient portal. Your log in information is as follows:
